

## MICROMOUNTERS OF NEW ENGLAND

The next meeting of the Micromounters of New England will be held at Boston University in the department of Geology, which is located at 725 Commonwealth Ave, Boston, Massachusetts on Saturday January 16, 1971. This meeting will be the same as the last meeting that we held there, Pete Dunn again invites us to return to Boston University.

9:00 to 12:00 Noon Set up microscopes, meet fellow collectors, have some of your unknowns looked at. Many of the members have micro material to trade, so bring some of your extras. There will also be a box of giveaways, as usual.

12:00 noon to 1 PM Lunch-bring your own or go accross the street to many of the restaurants nearby.

1:00 to 2:00 PM A discussion by our host, Pete Dunn, the curator at Boston University. Pete's interest will be on the importance of the collector's needs.

2:00 to 3:00 PM More looking at micros.

3:00 to 4:00 PM Slides of micro minerals by Ted Agos and Gil George.

4:00 to 6:00 PM Back to the scopes till quitting time.

Extra scopes will be available for those that do not have their own, but bring a light if possible as Pete does not have enough for all. This meeting and any meeting depends on all the members doing a share-a club is only as good as the members want it to be. I hope that the weather is good that weekend. About all that we have collected recently is snow crystals. Road cuts in Rhode Island are continuing to be blasted, but are soon covered up with snow. Hope to see you at the next meeting.
